Discover the benefits of the Vegetable Substrate Trough and take your cultivation to the next level.

No roots in the gutter

Less chance of root growth.

Beter root growth

Thanks to the higher tray structure, the substrate remains airier than a grow bag. This is ideal for healthy and strong roots.

Sustainable alternative

No more single-use plastic. Choose reuse & less residual waste.

Quick payback

Save on substrate costs by buying in bulk and reusing the tray.

Optimal drainage

The tray has feet and drainage holes on the bottom for optimal drainage. Optional drainage holes on the side are available.
